TITLE: PULL HANDLE PROVIDED WITH A GRIP HANDLE WITH AN ADJUSTABLE
ANGLE

PRELIMINARY AMENDMENT

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

In conjunction with the filing of the present application, and prior to an initial Official Action on this matter, please amend the above-identified application as follows:

Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraph [0002], please amend the paragraph as follows:

Owing to the extensible function of the pull handle of a conventional luggage compartment, the end-users can pull up the grip hand and extend the pull handle when dragging the luggage compartment. This design, in fact, has offered a comfortable grip to some extent. However, when the end-users drag the luggage compartments, they can find that the inclination grade of the luggage compartment will also affect the dragging effect. Furthermore, when the conventional luggage compartment of such design is dragged with its pull handle extended to a fixing state, the top ~~take end~~ of the luggage compartment will be tilted approximate to 45°. In such a case, as the luggage compartment presses the pull handles, the end-users will feel a sense of heaviness, which is directly proportional to the top ~~take end~~ of the luggage compartments. Though the end-users can adjust the inclination grade to reduce the sense of heaviness by raising their arms, this action will surely lead to a sensation of aching.

In Paragraph [0009], please amend the paragraph as follows:

FIG. 3 shows an exploded perspective view of the local structure of the grip handle of the present invention.

In Paragraphs [0011] to [0018], please amend the paragraphs as follows:
